PROFESSIONAL PROFILE

IBM-certified Generative AI Engineer with hands-on experience designing and building AI-powered applications and LangGraph ReAct agents using Python, LangChain, Flask, and the Anthropic Claude API. Skilled in developing multi-tool agent architectures, integrating REST APIs, and implementing secure OAuth 2.0 workflows. Experienced in prompt engineering, retrieval-augmented generation (RAG), and end-to-end generative AI application development. Focused on building practical, reliable AI systems that solve real-world problems.

PROJECTS

AI RESEARCH ASSISTANT

github.com/CHRISTIANSEBO/research-assistant

- 4-module LangChain agent powered by claude-sonnet and Tavily Search API – retrieves 3 sourced URLs per query, maintains full multi-turn conversational memory, and auto-saves every result to timestamped files.
- Handles 4 distinct error types (API failures, missing keys, empty input, malformed responses); includes --topic CLI flag for immediate query execution. Python, LangChain, Anthropic API.

AI EMAIL ASSISTANT

github.com/CHRISTIANSEBO/email-responder

- Full-stack LangGraph ReAct agent (Jean) with 6 custom Gmail tools – read, send, sort by urgency, open, summarize, and unsubscribe – backed by Google OAuth 2.0 and parallel thread-safe email fetching.
- Flask REST API backend with SQLite chat persistence, confirmation flow for sensitive actions, and a React/TypeScript frontend. Python, LangGraph, LangChain, Anthropic API, Gmail API, Flask, React.
